Local Official Traditional Appraisal Checklist (USPAP 2020-23)

THIS VALUATION METHOD CAN'T BE USED FOR CONDOMINIUM/HOA BUILDINGS

See 2nd page for supporting citations & explanations.

There should be only one "No" (for item 8).

Assignment Elements & Assignment Conditions

ΥN

1	Is it clear that the appraiser understands the appraisal's intended use?	
2	Is the floodplain administrator or local community identified as an intended user?	
3	Is there an appropriate definition of the value sought?	
4	Is the appraisal effective date (date of value) correct for the assignment?	
5	Is the appraiser state certified/licensed and certifying conformance to USPAP?	

Pertinent Facts (Accuracy & Consistency)

Y N

6		Is the building appraised as it was before the start of work, or as it was before damage?
7		Are exterior & interior images consistent with the building description & quality rating?
8		Are there misrepresentations, untrue statements, or incorrect building descriptions?

Appraisal Process (Methodology & Reasonableness)

Y N

9		Is the whole-property market value estimate logical and convincing?	
10		Was land value estimated using comparables, adjusted appropriately?	
11		Was land value and the value of other improvements (pool, pool cage, boat dock, guest	
		house, detached garage, etc. deducted from the whole-property value?	
12		Is the final value reported the value of only the under-roof portion of the building?	

Report Documentation (Adequacy)

Y N

13		Does the report contain enough images to understand the building?	
14		Is there adequate documentation in the form of a detailed cost report?	
15	Is the value of land & other improvements well documented?		

Appraisal Report Accepted	or Rejected
Reasoning:	

USPAP = the Uniform Standards of Professional Appraisal Practice; applies to all state-certified appraisers

SR = a USPAP Standards Rule; Standards Rules are binding

Assignment Elements & Assignment Conditions

1-5. The USPAP Scope or Work Rule requires appraisers to identify the appraisal problem to be solved including the intended use, the client and other intended users, the type and definition of value, the appraisal effective date, and any assignment conditions. 50 Percent Rule appraisal assignment conditions established in Section 3.4 of the SI/SD Desk Reference are:

- The appraisal intended use and the local floodplain administrator as a principal intended user.
- The appraisal effective date. When work is an improvement, the building value is estimated before the start of construction of the improvement. When work is the repair of damage, the building value is estimated before the damage occurred.
- The requirement that the value of land and other improvements be deducted.
- A call for a state-certified appraiser conforming with USPAP.

Credible assignment results [appraisal reports] require support by relevant evidence and logic. The credibility of assignment results is always measured in the context of the intended use.

Pertinent Facts

6-8. USPAP SR 2-1(a) requires appraisers to, "clearly and accurately set forth the appraisal in a manner that will not be misleading". The appraisal report must contain accurate descriptions of the building supported by images or other documentation consistent with the appraisal effective date and the intended use.

Appraisal Process

9-12. USPAP SR 2-2 (a)(x) requires appraisers to, "provide sufficient information to indicate that the appraiser complied with the requirements of Standard 1 by":

- (1) summarizing the appraisal methods and techniques employed.
- (5) summarizing the information analyzed and the reasoning that supports the analyses, opinions, and conclusions, including reconciliation of the data and approaches.

The latest version of this checklist, and support for Actual Cash Value valuations, is available free of charge at www.floodpointusa.com.

Report Documentation

13-15. USPAP SR 2-1 requires that each appraisal report:

- (b) "contain sufficient information to enable the intended user(s) of the appraisal to understand the report properly."
- (c) "clearly and accurately disclose all assumptions, extraordinary assumptions, hypothetical conditions, and limiting conditions used in the assignment."
